

APROBAT:

 Presedinte al Directoratului-Director General  
 Executiv-Inginer Sef  
 Dan Danulescu

02 / 06 2023

**TEMA TEHNICA PENTRU  
CONTRACTAREA LUCRARILOR DE PROIECTARE**

**1. DATE GENERALE**

1.1. Denumirea lucrarii: Montat sisteme de filtrare de tip ciclon-coalescer pe conductele aspiratie recirculare/aspiratie complete, compresoare 03-K1A,B.

1.2. Scopul urmat este acela de a se obtine:

|  |  |  |
|--|--|--|
| Studiului de fezabilitate al solutiei (Basic Design) | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| Studiul detaliat al solutiei (FEED)                  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| Proiect tehnic de detaliu pentru executie (DDE)      | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| Proiect de autorizare / reautorizare                 | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| Proiect de reparatie                                 | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |

1.3. Instalatia (serviciul) beneficiara: Aria de Productie – Sector 1

1.4. Amplasament: Instalatia HB.

1.5. Documente si documentatii de referinta

**2. NECESITATE SI OPORTUNITATE**

2.1. Necesitatea montarii a 2 sisteme de tip ciclon-coalescer pe conductele de aspiratie recirculare si aspiratie complete la compresoarele 03-K1A si 03-K1B pentru retinerea lichidului si impuritatilor mecanice din gazele cu hidrogen necesare procesului de hidrofinare. Prin montajul acestor sisteme de va reduce uzura pieselor de compresie.

**3. PRINCIPALELE CERINTE**

- 3.1 Elaborarea memoriilor tehnice necesare obtinerii avizelor si autorizatiilor ISCIR, CNCIR pentru inlocuirea sistemului.
- 3.2 Obtinerea avizelor si autorizatiilor necesare implementarii proiectului.
- 3.3 Elaborarea specificatiilor tehnice de procurare echipamente si materiale.
- 3.4 Verificarea documentatiei tehnice si a ofertelor primite de la potentialii furnizori, efectuarea analizei comparative cu datele din specificatiile de procurare si evaluarea acestora in ceea ce priveste scopul proiectului si emiterea punctului de vedere al proiectantului.

- 3.5 Elaborarea documentatiei de executie si/sau de montaj in conformitate cu normele si legislatia romaneasca si UE in vigoare.
- 3.6 Se vor elabora memoriile si se vor indica volumele de expertiza necesare a fi realizate in cazul in care sunt implicate constructii (fundatii, constructii metalice, conducte, sisteme de aparare la incendiu), echipamente (statice / dinamice) sau conducte existente. Expertizele trebuiesc a solicitate doar in conformitate cu:
- Legea nr.10 / 1995 Calitatea in constructii republicata;
  - Ordinul MAI nr. 129/2016 - Aprobarea normelor metodologice privind avizarea si autorizarea de securitate la incendiu si protectie civila;
  - HG nr. 2139 din 30 noiembrie 2004 pentru aprobarea Catalogului privind clasificarea si duratele normale de functionare a mijloacelor fixe;
  - Regulamente si normele ANRE gaze si electric;
- 3.7 Elaborarea documentatiei economico-financiara pentru implementarea solutiilor CAPEX-OPEX (devize pe ficare disciplina, devizul general, evaluarea efectelor in urma implementarii, etc).
- 3.8 Revizuirea schemelor de proces (PFD – Precess Flow Diagrams), de conducte si automatizari (P&ID – Process & Instrumentation Diagrams), bilanturi energetice si materiale (HMB – Heat & Material Balance) in conformitate cu modificarile induse de implementarea solutiei;
- 3.9 Realizarea verificarilor finale “Controlul de Autor” asupra implementarii proiectului conform documentatiei elaborate si furnizarea documentatiei “Revizie finala” sau “As-Build” inclusiv a celei de executie (DDE), care sa includa toate modificarile sau derogarile emise pe durata realizarii proiectului propriu-zis.
- 3.10 Relevarea in teren precum si identificarea documentelor existente ce pot utilizate;
- 3.11 Va indica necesitatea si cantitatile necesar a fi dezizolate de pe conducte si echipamente, cantitatea de schele temporare pentru efectuarea releveelor si/sau a expertizelor.
- 3.12 Trebuie sa furnizeze raport privind relevarea in teren si evaluarea documentelor puse la dispozitie de beneficiar.
- 3.13 Elaborarea planului de amplasare pentru obiectivele noi/ modernizate;
- 3.14 Va elabora si furniza caiete de sarcini si cerintele necesare pentru realizarea studiilor si expertizele necesare implementarii solutiei.
- 3.15 Va elabora si prezenta studiile TOPO si GEO pentru amplasamentul identificat, in cazul in care acestea sunt necesare pentru obtinerea Autorizatiei de construire;

#### 4. DESCRIEREA SOLUTIEI PROPUSE

##### 4.2. Descrierea solutiei propuse pe categorii de lucrari:

Montat sisteme de filtrare de tip ciclon-coalescer pe conductele de aspiratie compresoare 03-K1A,B

##### 4.3. Documentatie disponibila PLK

| Nr. crt. | Categorii de lucrari | Descriere sumara | Inclus in scop  | Anexa | Observatii |
|----------|----------------------|------------------|---|-------|------------|
| <b>1</b> | <b>Tehnologii</b>    |                  |   |       |            |
| 1.1.     | Scheme de principiu  |                  | DA <input checked="" type="checkbox"/><br>NU <input type="checkbox"/> |       |            |

|          |   |   |  |  |  |  |
|----------|---|---|--|--|--|--|
| 1.2.     | PFD, Bilant material si termic  |   | DA <input type="checkbox"/>                              | NU <input checked="" type="checkbox"/> |  |  |
| 1.3.     | P&ID  |   | DA <input checked="" type="checkbox"/>                   | NU <input type="checkbox"/>            |  |  |
| 1.4.     | Diagrama Cauza-Efect  |   | DA <input type="checkbox"/>                              | NU <input checked="" type="checkbox"/> |  |  |
| 1.5.     | Studiu HAZOP  |   | DA <input type="checkbox"/>                              | NU <input checked="" type="checkbox"/> |  |  |
| 1.6.     | Manual de operare cu instructiunile pe faze   |   | DA <input type="checkbox"/>                              | NU <input checked="" type="checkbox"/> |  |  |
| 1.7.     | Caracterizarea fluxurilor tehnologice – calitate produse                                      |   | DA <input checked="" type="checkbox"/>                   | NU <input type="checkbox"/>            |  |  |
| <b>2</b> | <b>Utilaje</b>  |   |  |  |  |  |
| 2.1.     | Existente / Refolosite din existent   |   | DA <input type="checkbox"/>                              | NU <input checked="" type="checkbox"/> |  |  |
| 2.2.     | Echipamente noi   |   | DA <input checked="" type="checkbox"/>                   | NU <input type="checkbox"/>            |  |  |

| Altele: <i>se vor enumera dupa caz....</i> | DA <input type="checkbox"/>   | NU <input checked="" type="checkbox"/>                       |   |  |
| 16   | Alte facilitati   |  |   |  |
| 17   | Devize costuri pe discipline  |  |   | DA                                     |
| 18   | Devize cost total general   |  |   | DA                                     |

4.3. Alte cerinte sau dotari solicitate: nu e cazul

## 5. DOCUMENTATIA CARE TREBUIE LIVRATA

5.1. Tipul, calitatea si cantitatea documentatie indicata mai jos reprezinta continutul minim al pachetului care se solicita a fi livrat, functie de particularitatile lucrarii pot fi adaugate si alte

tipuri de documente care sunt necesare ideplinirii scopului, a tuturor cerintelor legale si de securitate a lucrarilor.

5.2.Furnizorul are obligatia sa indice in continutul ofertei tehnice documentatia suplimentara necesara a fi elaborata si livrata in pachetul de documentatie a proiectului.

5.3. Furnizorul trebuie sa indice in continutul ofertei tehnice cantitatea si calitatea setului de documentatie si/sau pachetul minim de informatii preliminare ce vor trebui a fi furnizate de catre Beneficiar, informatii provenind de la licentiatori, autorii de Basic Design-uri, furnizorii de echipamente sau a altor entitat si care ii sunt necesare pentru elaborarea scopului in termen, conform Graficului de executie asumat.

5.4. Furnizorul are obligatia sa prezinte in cadrul ofertei tehnice Graficul de realizare si de livrare a documentatiei tehnice de proiectare tinand cont de etapele de dezvoltare a proiectului in detaliu si cu conditionarile aferente confrom 5.3.

| <b>1. Tehnologie</b>             |   |  |  |
|----------------------------------|---|--|--|
| 1.1                              | Memoriu tehnic  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 1.2                              | Scheme de principiu   | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 1.3                              | PFD, Bilant material si termic  | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 1.4                              | P&ID  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 1.5                              | Diagrama Cauza Efect  | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 1.6                              | Studiu HAZOP  | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 1.7                              | Manual de operare cu instructiuni pe faze   | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 1.8                              | Aviz verificare MEC   | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| <b>2. Conducte</b>               |   |  |  |
| 2.1                              | Memoriu tehnic  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.2                              | Lista conductelor la care se intervine  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.3                              | Lista conductelor noi   | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.4                              | Identificarea, elaborarea si alocarea claselor de conducte, atat pentru cele noi cat si pentru cele existente | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.5                              | Lista punctelor Tie-In (conexiune vechi – nou)  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.6                              | Calcularea si dimensionarea conform SR EN13480  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.7                              | Elaborarea izometriilor model 2D & 3D   | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.8                              | Lista necesar materiale, inclusiv suporti, stalpi sau estacade cu precizie de $\pm 10\%$                      | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.9                              | Documentatie necesara efectuarii expertizelor   | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.10                             | Proiect de reparatii conducte semnat si stampilat RADTP si MEC  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.11                             | Avizele si autorizatiile autoritatilor romane (CNCIR, ANRE, etc)  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 2.12                             | Caiet de sarcini pentru constructor   | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| <b>3. Echipamente si utilaje</b> |   |  |  |
| 3.1                              | Memoriu tehnic incluzind standardele de fabricatie  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 3.2                              | Program control de calitate si grafic urmarire pe etape fabricatie  | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 3.3                              | Lista echipamentelor cu indicarea tag-name conform P&ID, caracteristicile principale de design si operare     | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 3.4                              | Specificatii de procurare – Fise Tehnice  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 3.5                              | Documentatia si desenele de executie (DDE)  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |

|   |   |  |  |
|---|---|--|--|
| 3.6   | Conditii si cerinte privind protectia impotriva corozivitatii, eroziunii si pentru securitatea personalului   | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 3.7   | Instructiuni privind transportul, conservarea, montajul, pregatire si punerea in functiune, scoaterea din operare si pregatirea echipamentului pentru activitati de inspectii si mentenanta | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 3.8   | Lista cu necesarul materiale pentru PIF si piesele de schimb pentru 2 ani exploatare  | DA <input checked="" type="checkbox"/> | NU <input type="checkbox"/>            |
| 3.9   | Proiectul de executie / reparatie semnat si stampilat RADTP si MEC  | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 3.10  | Memorii si documentatia necesara efectuarii expertizelor echipamentelor existente   | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 3.11  | Avizele si autorizatiile autoritatilor romane (CNCIR, etc) certificari PED si NoBo  | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |
| 3.12  | Avizarea ofertelor tehnice (2 revizii) pentru calificarea la licitatie  | DA <input type="checkbox"/>            | NU <input checked="" type="checkbox"/> |

NOTES:  
1. MATERIALS FOR PRESSURE PARTS SHALL COMPLY WITH THE REQUIREMENTS OF THE MATERIALS TECHNICAL REQUIREMENTS SHEET NO: 23-001 23 000 FCTM.  
2. RAISED FACE: SERRATED SPIRAL FINISH MACHINED WITH A CUTTING TOOL HAVING A RADIUS OF 16<sup>±4</sup> mm AND A PITCH OF 0.6 mm. THE RESULTANT SURFACE FINISH SHALL HAVE Ra=3.2 μm.  
3. MAX. ALLOW. OUT-OF-ROUNDNESS FOR SHELL OF COMPLETED VESSEL (D<sub>MAX</sub>-D<sub>MIN</sub>) SHALL NOT EXCEED 1% OF NOMINAL DIAMETER.  
4. THE INSPECTION METHODS, NORMS, VOLUME OF CONTROL AND ACCEPTANCE CRITERIA ARE SPECIFIED IN NONDESTRUCTIVE EXAMINATION PLAN.  
5. THE BOLT HOLES IN FLANGES AND FORGED NOZZLES SHALL STRADDLE THE LONGITUDINAL AXIS OF THE VESSEL (I. L.) OR AXES PARALLEL TO 0°-180°, 90°-270° AXES.  
NOTE:  
1. MATERIALELE REPERELOR SUPUSE PRESIUNII VOR CORESPUNDE CONDITIILOR PREVAZUTE IN FISA DE CONDITII TEHNICE DE MATERIALE, NR. 23-001 23 000 FCTM.  
2. SUPRAFATA DE ETANSARE PRELUCRATA PRIN STRUNJIRE FRONTALA CU UN CUITIT CU RAZA DE 16<sup>±4</sup> mm SI AVANS DE 0.6 mm. RUGOZITATEA REZULTATA VA FI Ra=3.2 μm.  
3. OVALITATEA MAX ADMISA PENTRU MANTAU VA VASULUI IN STARE FINALA (D<sub>MAX</sub>-D<sub>MIN</sub>) NU TREBUIE SA DEPASEASCA 1% DIN DIAMETRUL NOMINAL.  
4. IN PLANUL DE CONTROL NEDISTRUCTIV, SUNT SPECIFICATE METODELE DE CONTROL, NORMELE, VOLUMUL CONTROLULUI SI CRITERIILE DE ACCEPTARE.  
5. GAURILE PENTRU SURUBURI DIN FLANSE SI RACORDURI FORJATE VOR FI APLASATE SIMETRIC FATA DE AXA LONGITUDINALA A VASULUI SAU FATA DE AXE PARALELE CU AXELE 0°-180°, 90°-270°.

NOTES:  
1. MATERIALS FOR PRESSURE PARTS SHALL COMPLY WITH THE REQUIREMENTS OF THE MATERIALS TECHNICAL REQUIREMENTS SHEET NO. 23-002 23 000 FCTM.  
2. RAISED FACE SERRATED SPIRAL FINISH MACHINED WITH A CUTTING TOOL HAVING A RADIUS OF 16<sup>3/4</sup> mm AND A PITCH OF 0.6 mm. THE RESULTANT SURFACE FINISH SHALL HAVE Ra=3.2 µm.  
3. MAX ALLOW OUT-OF-ROUNDNESS FOR SHELL OF COMPLETED VESSEL (DMAX-DMIN) SHALL NOT EXCEED 1% OF NOMINAL DIAMETER.  
4. THE INSPECTION METHODS, NORMS, VOLUME OF CONTROL AND ACCEPTANCE CRITERIA ARE SPECIFIED IN NONDESTRUCTIVE EXAMINATION PLAN.  
5. THE BOLT HOLES IN FLANGES AND FORGED NOZZLES SHALL STRADDLE THE LONGITUDINAL AXIS OF THE VESSEL (I.E. L) OR AXES PARALLEL TO 0°-180°, 90°-270° AXES.

NOTE:  
1. MATERIALELE REPERELOR SUPUSE PRESIUNII VOR CORESPUNDE CONDITILOR PREVAZUTE IN FISA DE CONDITII TEHNICE DE MATERIALE NR. 23-002 23 000 FCTM.  
2. SUPRAFATA DE ETANSARE PRELUCRATA PRIN STRUNJIRE FRONTALA CU UN CUITI CU RAZA DE 16<sup>3/4</sup> mm SI AVANS DE 0.6 mm. RUGOZITATEA REZULTATA VA FI Ra=3.2 µm.  
3. OVALITATEA MAX ADMISA PENTRU MANTAUJA VASULUI IN STARE FINALA (DMAX-DMIN) NU TREBUIE SA DEPASEASCA 1% DIN DIAMETRUL NOMINAL.  
4. IN PLANUL DE CONTROL NEDISTRUCTIV, SUNT SPECIFICATE METODELE DE CONTROL, NORMELE, VOLUMUL CONTROLULUI SI CRITERIILE DE ACCEPTARE.  
5. GOURILE PENTRU SURUBURI DIN FLANSE SI RACORDURI FORJATE VOR FI AMPLASATE SIMETRIC FATA DE AXA LONGITUDINALA A VASULUI SAU FATA DE AXE PARALELE CU AXELE 0°-180°, 90°-270°.

 KELBURN REFERENCE Job No. 39403

DESIGN DATA

FLUID / PED GROUP Hydrogen Gas, Group 1  
 PED 2014/68/EU Category III, Module G  
 DESIGN CODE ASME VIII-1 (No Code Stamp)  
 OPERATING CONDITIONS 13 barg @ 35°C  
 DESIGN CONDITIONS FV/16 barg @ -45/+70°C  
 CORROSION ALLOWANCE 1.6mm  
 VISUAL (VT) 100%  
 LIQUID PENETRANT (PT) None  
 MAGNETIC PARTICLE (MT) 100%  
 ULTRASONIC (UT) None  
 RADIOGRAPHIC (RT) None  
 TEST PRESSURE 23 barg  
 EMPTY WEIGHT 259 kg  
 OPERATIONAL WEIGHT 259 kg  
 HYDROTEST WEIGHT 306 kg  
 INTERNAL VOLUME 47 Litres  
 COATING SYSTEM 1x Primer, 2x Intertherm 50.  
 CASTING HEAT TREATMENT Quenched @ 920°C, tempered @ 640°C.

NOTES

- FLANGE BOLT HOLES TO STRADDLE PRINCIPAL CENTRELINES OF THE VESSEL.
- ITEMS 2 & 5 NOT SHOWN ON DRAWING.
